SUMMARY

Senior Front-End Engineer with 8+ years of experience building scalable, high-performance UI systems. Strong expertise in JavaScript, TypeScript, and Angular with proven ownership of frontend architecture, performance optimization, and production delivery.

TECHNICAL SKILLS

Frontend Design: Component-driven architecture, modularization, lazy loading, code splitting

Languages & Frameworks: TypeScript, JavaScript (ES6+), Angular (v9+), RxJS, NgRx, HTML, CSS

Performance & Quality: Change detection optimization, rendering optimization, accessibility (a11y), performance profiling, unit testing (Jasmine, Karma)

Tooling: Git, Jira, CI/CD (Bamboo, Jenkins)

EXPERIENCE

Senior Software Engineer

August 2024 to Present

Wipro Limited

Bangalore, India

- Owned end-to-end frontend architecture for a large-scale customer-facing platform, driving decisions on UI structure, performance strategy, and long-term maintainability.
- Led and mentored a team of 5 engineers, improving delivery quality, consistency, and execution.
- Migrated 6 production-grade applications from Blazor to Angular with a modular, scalable architecture.
- Reduced JavaScript bundle size by 30% using code splitting and lazy loading, improving initial load time by 40%.
- Improved Time to Interactive (TTI) by 35% by optimizing change detection mechanisms and rendering paths.
- Led production rollout and ensured smooth transition by resolving performance regressions and critical UI defects.

Software Engineer I

July 2023 to July 2024

Harman International Industries, Inc.

Bangalore, India

- Designed and shipped production ready 30+ reusable Angular components used across 6+ different products.
- Architected a JSON-driven, API-backed dynamic UI rendering framework, enabling rapid experimentation and 10x faster feature delivery.
- Introduced TDD practices achieving 60% unit test coverage and reducing post-release defects by 50%.
- Worked closely with multiple product teams to onboard the rendering framework and standardize UI patterns.

Software Engineer

April 2020 to June 2023

Harman International Industries, Inc.

Bangalore, India

- Owned and developed critical frontend modules using Angular, TypeScript, and RxJS.
- Collaborated closely with UX, backend, and product teams.
- Improved UI reliability and responsiveness by resolving performance bottlenecks and existing production defects.

Application Developer

December 2017 to March 2020

Conduent Business Services LLP

Bangalore, India

- Designed configurable UI modules supporting 36 customer-specific workflows.
- Built secure, high-reliability document processing user interfaces used by 150+ customer organizations.
- Led migration from Silverlight to Angular, reducing installer size by 75%.
- Validated workflows with QA and business stakeholders to ensure compliance, reliability, and production readiness.

EDUCATION

Centre for Development of Advanced Computing

Bangalore, India

PG-Diploma in Advanced Computing

Feb 2017 to May 2017

Jaypee Institute of Information Technology

Noida, India

B.Tech in Computer Science and Engineering

Aug 2010 to July 2014
