Summary

Senior Front-end Engineer with 8+ years of experience building scalable, high-performance web applications. Expertise in frontend architecture, TypeScript, performance optimization, and accessibility, with a proven track record of delivering reusable UI platforms and enterprise-scale products.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS/SCSS, SQL

Frameworks & Tools: Angular, React, Node.js, Express.js, Chart.js, RxJS, NgRx, Material UI, Figma, Postman

Architecture: Microfrontend (Module Federation), Design Systems, SPA, REST APIs

DevOps & CI/CD: Webpack, Jenkins (CloudBees), Ansible, Git, GitHub Actions, Docker

Testing & Quality Tools: Accessibility (a11y, WCAG 2.1), Chrome Devtools, Lighthouse, Jasmine, Karma, Jest

Experience

Senior Software Engineer

Aug 2024 to Present

Wipro Limited

Bangalore, India

- Owned end-to-end frontend architecture for a large-scale customer-facing platform, driving decisions on UI structure, performance strategy, and integration with backend services deployed on cloud platforms.
- Spearheaded and mentored a team of 5 engineers, improving code quality, accessibility (a11y), and development velocity using AI-assisted tools.
- Migrated 6 production-grade applications from Blazor to Angular with a modular, scalable architecture.
- Reduced JavaScript bundle size by 30% using code splitting and lazy loading, cutting page latency and improving initial load time by 40%.
- Improved Time to Interactive (TTI) by 35% through change detection tuning and rendering paths optimization.
- Applied component-driven architecture and reusable UI patterns aligned with modern frameworks like React.

Software Engineer I

Jul 2023 to Jul 2024

Harman International Industries, Inc.

Bangalore, India

- Drove adoption of a JSON-driven, API-backed dynamic UI rendering framework across 6+ product teams, standardizing frontend architecture and reducing per-feature development effort by 60%.
- Implemented virtualized rendering for 10k+ record accordion views, minimizing DOM footprint and ensuring consistent UI responsiveness as dataset size scaled.
- Built the UI for a Sound Pressure Level (SPL) visualization platform used to map and optimize acoustics for a 125k-capacity venue.
- Partnered with QA and business stakeholders to define acceptance criteria for 4 different modules, achieving zero critical production defects across 3 consecutive releases.

Software Engineer

Apr 2020 to Jun 2023

Harman International Industries, Inc.

Bangalore, India

- Created 30+ reusable Angular components adopted across 6+ products, improving development consistency.
- Introduced Test-Driven Development (TDD), achieving 60% coverage and reducing post-release defects by 50%.
- Developed and owned 8 critical frontend modules using Angular, TypeScript, and RxJS.
- Resolved performance bottlenecks, reducing average page response time by 30% across key user workflows.

Application Developer

Dec 2017 to Mar 2020

Conduent Business Services LLP

Bangalore, India

- Delivered configurable UI modules supporting 36 customer-specific workflows with responsive design.
- Built secure, high-reliability document processing UIs and REST APIs used by 150+ customer organizations.
- Engineered responsive, high-performance UI supporting multiple device form factors and large-scale workflows.
- Drove migration from Silverlight to Angular, reducing installer size by 75%.

Education

Centre for Development of Advanced Computing

Bangalore, India

PG-Diploma in Advanced Computing

Feb 2017 to May 2017

Jaypee Institute of Information Technology

Noida, India

B.Tech in Computer Science and Engineering

Aug 2010 to Jul 2014
